The importance of training

With over 30 years' experience in assisting our customers and partners in the development of supervisory applications, we are conscious of your time constraints and the need to be concise and go straight to the point.

We also know from this same experience that well-trained staff can significantly reduce development time and are key to the success of your projects.

For those reasons we offer a training catalog that is regularly updated to match your needs and provide essential knowledge about the latest technologies integrated in PcVue Solutions.

All our courses include practical exercises that allow students to get actively involved in the mastery of our solutions.

Our trainers and engineers also have extensive experience supporting supervisory projects, allowing them to meet any special demands during training.

Don't wait – get trained in PcVue Solutions and discover its innovations!

> 66 Training is provided throughout the year at all our branches and subsidiaries in France and overseas 99

Training opportunities

Training is provided throughout the year at all our branches and subsidiaries in France and overseas.

To organize training just get in touch with your local sales representative or send your inquiries to training@arcinfo.com.

To obtain further training on a particular topic we also offer e-learning solutions allowing you to optimize your time by training as and when it is convenient to you.

You can find our training schedule on our website:

www.pcvuesolutions.com.

PcVue training plan

To discover more information about the content of all our courses you can obtain the full PcVue Solutions training descriptions by contacting your local sales representative.

Useful information

Registration Procedures

Applications for training registration in our premises can be directly made on our website. Our training department will contact you to confirm your reservation based on availability.

It is also possible to make a reservation by sending us an order specifying the names of the participants, the selected training and the chosen date. Upon receipt of this document we will send you joining instructions and practical information (map, transport, hotels ...)

Training locations

Training in our headquarter (Paris - France) and in all our subsidiaries.

Practical conditions

Each trainee has a work station and at the start of the training is provided with digital course material that comprises various modules detailing the major product features.

Theory 50% / 50% Practice

Each module consists of a theoretical part, presented by the trainer, and a practical part based on application exercises allowing the student to deepen his knowledge with the assistance of the trainer.

At the end of the training the trainee is permitted to take the digital course material away as well as a corrected copy to allow her/him to return to certain subjects if necessary.

Number of participants

We reserve the right to cancel or postpone training if the minimum number of participants required is not reached.
